COS 301 SOFTWARE ENGINEERING

Author: Teboho Mokoena

March 12, 2018

MY BIOGRAPHY

0.0.1 Teboho Mokoena

Course : BSc Information Technology

Career Interest : Software Engineering, Systems Analyst, and Mobile Application Development

Skills :

- Programming (and Netcentric) Languages: C++, Java, C, C sharp, MongoDB, NodeJS, Javascript, PHP

- Android Application Development and .Net Application Development

- Software Modelling, Operating System and Concurrent Systems

- API and REST Architecture interfaces

- Xamarin Mobile Application development

Bio : I started BSc IT (Knowledge and Information Systems) in 2015, I am currently doing my final year at the University of Pretoria. I have been a member of World CodeSprint 12 (local and global coding competition) since the year 2016. My enthusiasm for programming and Computer Science remains undiminished after facing many challenges, including a cancer diagnosis (which I underwent treatment for and have been cured from) and the death of two immediate-family members - to mention a few. I have a determination to finish what I start and a hunger to do more. I have demonstrated relentless passion for programming and software engineering which has afforded me the opportunity to be where I am today.

Previous Work Experience:

- COS 132 (Imperative Programming) Tutor for all Computer Engineering, Computer Science and BSc IT students at Respublica Student Accommodation since 2016.

- INF 154,164,272,354 Tutor for All BSc IT and BCom Informatics students at Respublica Student Accommodation since 2016

- Freelance Web Developer and App Developer for starting companies
