Team: Binary Ninjaz

Report of last week's work:

- Shaun touched up on the invalid input text, added/changed incorrect fields and fixed resizing of pages.
- Letanyan synced the app design, helps in financial analysing and helped prepare for deployment.
- Sizo fixed the web login and sign up when resized, did further testing and helped prepare for deployment.
- Teboho did further testing and helped prepare for deployment.
- Kevin synced the app design, catered for different time zones and fixed graph filtering.
- John synced the app design, helped prepare for deployment and catered for different time zones.

Comment: We are still yet to get real world data so we aim to handle that over the course of the week.

Coming week's work assignment:

Name:	Work assignment:
Shaun Yates	Research on machine learning. Populate with real world data. Update documentation.
Letanyan Arumugam	Research on machine learning. Populate with real world data. Update documentation.
Sizo Duma	Research on machine learning. Populate with real world data. Update documentation.
Teboho Mokoena	Research on machine learning. Add predictions dependent on weather. Update documentation.
Kevin Reid	Research on machine learning. Add predictions dependent on weather. Update documentation.
John Ojo	Research on machine learning. Add predictions dependent on weather. Update documentation.
